MONDRIAN

Artist Piet Mondrian was an important leader in the development of modern abstract art. His art evolved over his lifetime into his own unique style, which he called “neo-plasticism.” This style allowed the artist to let go of any specific subject and gave him complete freedom of expression.

Mondrian was a passionate painter, and would paint until his hands were blistered. Sometimes he even made himself sick, or cried from fatigue. In his New York apartment, he painted large colored panels which covered his walls.
