

BLACK GLUE JELLYFISH

Black glue is a cool art technique that can be used with so many themes and with all ages!

INSTRUCTIONS

STEP 1: Print the jellyfish template.

STEP 2: Mix the glue and black paint. Use to outline your jellyfish template. Let dry.

STEP 3: Use watercolor paints to add color to your jellyfish.

STEP 4: While the paint is still wet, sprinkle salt onto your design to create a textured, almost sparkly effect.

STEP 5: Once dry, cut out your jellyfish and glue to card stock.

JELLY FISH

Jellyfish are fascinating creatures that live in the ocean. They belong to a group of animals called cnidarians, which also includes corals and sea anemones. Jellyfish are known for their unique appearance and graceful movements.

One of the most distinctive features of jellyfish is their stinging tentacles. They are covered in specialized cells called nematocysts, which contain venomous barbs. When a jellyfish encounters prey it releases these barbs, injecting venom into its target.

SUPPLIES

Jellyfish template
Black acrylic paint
